#Errata for *ASP.NET MVC with Entity Framework and CSS*

*On **page 112***, last paragraph before the code listing at the bottom of the page, this sentence:

Now that we have the helper methods in place, we need to modify the Create() method of
the **ProductController** class to upload files when a product is created. First of all, rename both Create()
methods to Upload().

…should read:

Now that we have the helper methods in place, we need to modify the Create() method of the
ProductImageController class to upload files when a product is created. First of all, rename
both Create() methods to Upload().

(The word **ProductController** should read **ProductImageController**.)
